

SOFTWARE

# Convert to MiTek Structure with Integrated Truss Design

# MiTek<sup>®</sup> STRUCTURE

**The most powerful structural modeling, editing, and estimating functionality in the industry.**

## BENEFITS OF CONVERTING

- Faster and more accurate design process
- Automatically updates truss design modifications in the model
- Structural model changes in real time
- Easily combine multiple conditions into a single truss design (8.7.0)
- Drag and drop updates to plates, webs, and chord splices
- Better integration with MiTek Management
- Easier to learn and operate due to more accessible tools, details, and properties with fewer pop-up dialogs
- Compare the cost of multiple designs of a single truss in a model
- Model roof loads on floor trusses and floor loads on roof trusses
- Automatic interior chord loading

## A FLEXIBLE CONVERSION PROCESS

When converting to MiTek Structure with Integrated Truss Design, you get increased functionality, performance, and enhanced support from MiTek for training and onboarding your designers.

The conversion process takes approximately five weeks for existing customers and is flexible to accommodate training across multiple users and locations.
